Featured Projects

01

FCIS2023

An archive of CS materials that contains lectures, tutorials, and labs split into 8 subdomains for each semester with its admin dashboard. The website has a high viewership of over 50K per month, making it a valuable resource for students studying computer science at FCIS AinShams.

02

Stiq'a Store

Developed an e-commerce website for a small business specializing in stickers. The website attracts over 1K visitors per month, providing a convenient platform for customers to browse and purchase Stiq'a's products.

03

Certi.to

The website offers a straightforward solution for issuing NFT certificates, with customizable templates and a simple editor that requires no technical expertise.
